

ITP EXERCISES REVISED SPEC

06-Iterative Statements (Loops)

"stdin" >>>> input()

"stdout" >>>> print()

Traversing a collection

1. Create a new file named **06-traverse-collection** with an extension of dot **py** for Python
2. Create an array named `plantagenets` comprising the following values:
 - Henry II
 - Richard I
 - John
 - Henry III
 - Edward I
 - Edward II
 - Edward III
 - Richard II
3. Use a for loop to traverse the `plantagenets` array and write each element to `stdout`.

Iterative number squarer
